

AMMISSETTY DHARANI

2nd Year Undergraduate Student

Email: ammisettydharani@gmail.com

Phone: 7330867394

CAREER OBJECTIVE

Motivated and enthusiastic undergraduate student seeking opportunities to apply technical knowledge, develop practical skills, and contribute to meaningful academic or industry projects while continuously learning.

EDUCATION

Qualification	Year / Status
Undergraduate Degree	2nd Year – Pursuing

TECHNICAL EXPOSURE

- HTML & CSS – webpage structure and responsive website design
- C Programming – basic programming and problem solving
- Data Structures – stacks, queues, searching and sorting
- Artificial Intelligence – search strategies and knowledge representation
- Embedded Systems – microprocessors, microcontrollers and basic architecture
- GitHub – basic project hosting and repository usage

ACADEMIC / PERSONAL PROJECTS

Student Result Processing System — Designed a flowchart-based solution for processing student results using structured problem-solving steps.

Agriculture Website — Created a mobile-friendly agriculture website concept using HTML and CSS.

Obstacle Avoiding Robot — Worked on an obstacle-avoiding robot project concept using sensors, control logic and embedded-system principles.

KEY STRENGTHS

- Quick learner and willing to learn new technologies
- Problem-solving mindset
- Teamwork and communication
- Presentation and project documentation

INTERESTS

Web Development • Artificial Intelligence • Emerging Technologies • Academic Projects
